Cory Morrissey

Student at PDX Code Guild

Portland, Oregon Area

Summary

My name is Cory Morrissey. Currently I am working on finishing my full stack web development certification at PDX Code guild. Our estimated date of completion is January 23rd, 2019. I am a quick learner, and love new challenges.

Experience

W.S.L Inc

Office Administrator

April 2017 - October 2018 (1 year 7 months)

Portland, Oregon Area

At W.S.L. I worked as an office administrator, mostly focusing on data entry and troubleshooting problems that customers encountered. Here I honed my ability to keep very organized, finish deadlines in a timely manner, and multitask with coworkers, managers, and customers. I was able to analyze the needs of the customers as well as the company and based the organization of my data entry to best fit their needs. I vastly improved upon the previous way that the company handled their data entry to make things as clear and efficient as possible for the customers and the company alike.

Ground Coffee

Supervisor / Barista

January 2014 - March 2017 (3 years 3 months)

Hood River, OR

I worked at Ground as a barista for three years. My focal points as a supervisor were maintaining clear communication, having excellent time management, and working well with others. Working as a face of the public also taught me the social and personal skills I still apply to my every day life.

Education

PDX Code Guild

Full Stack Web Development · (2018 - 2019)
